

VMD 105

To:

Morning, I am taking this class because it is a requirement for my major. The  
reason why I used mint green is to match the color theme of the project.

## RASTER PROJECT

To:

The final raster project is to create a selfie. Because I really love food, I came up with the idea of being surrounded by food, and I am eating. The most difficult part was putting the food in the right position and showed the hirechy.

## VECTOR PROJECT

To:

In the vector project, I created a monster who alway feels hungry. I am not satisfied with my outcome. Becasue the whole image looks chaotic and messy and the color of the monster are mess up. If I can improve it, I will change to a simple background. I might change the color of the Monster, and add stroke too.

**RASTER PROJECT**

To:

I had several ideas before I stated the motion project. But I decided to make fan-  
tastic story about a hungry crocodile who is “fighting” with the shower head and is fed  
by it. The biggest challenge is to control and change different parts of crocodile at the  
same time.
